

Who Should Attend & Seminar Outline

There are major changes effecting temporary traffic management standards in Ireland. In June 2017, the Department of Transport has initiated a major consultation with the sector on a new operations document. This will have a significant impact on existing temporary traffic management design standards and training. Any organisation working on or near roads will be impacted by these changes.

This seminar is relevant to any organisation working on or near public roads. Such work includes

- building and maintaining roads and footpaths
- road openings for utilities and services
- working on, above or under roads as part of your activities

This includes local authorities, utilities, consultants and contractors.

Note: This half day training seminar is not a replacement for the Construction Skills Certification Scheme (CSCS) and/or SOLAS 3-day Signing, Lighting and Guarding at Roadworks training. However, the seminar will be good refresher training for those who have already completed their SOLAS 3-day training and are looking to keep their knowledge up to date.

Other NISO events & activities include:

- Health and safety training courses, seminars and workshops
- Annual Health and Safety Conference and Trade Exhibition
- Annual All Ireland Occupational Safety Awards
- Annual All Ireland Occupational Safety Quiz
- Publications and newsletters
- Benefits and bonuses for NISO members

Visit niso.ie

Managers, job planners, engineers, safety staff and supervisors within those organisations will be given practical advice on:

1. Managing risks associated with temporary traffic management within the organisation's safety management system and at works sites on the ground
2. Identifying appropriate controls and proper assignment of responsibilities
3. Systems of control
 - a. Standard plans & layouts: how to ensure they are applied correctly to specific sites
 - b. Site specific plans
 - c. Job Packs: What do your operatives need to ensure they can do the job safely
4. Planning & design of roadworks in accordance with Chapter 8 of the Traffic Signs Manual
5. How to deploy temporary traffic management safely and the implications of the new operations guidance document
6. Safety for pedestrians & vulnerable road users
7. The training requirements for those involved in temporary traffic management

Speaker

Charlie Kerr (BE CEng MIEI)

Charlie is a professional and nationally recognised engineer with solid design, management and operational experience in road asset management, traffic management and health and safety. He is the managing director at Tobar Segais, a consultancy firm engaged by the Department of Transport, large consultants and contractors on new standards development and innovative projects. Charlie holds the unique position of being a principle member of every group on national standards for traffic management at roadworks

Charlie Kerr (BE CEng MIEI)

- He is currently working on the operations document for Chapter 8 of the Traffic Signs Manual for the Department of Transport
- He has worked on both editions of “Guidelines for the Control of Traffic at Roadworks” for Department of Transport, LGMA and endorsed by HSA
- Charlie has contributed to revisions and advice notes on Chapter 8 of the Traffic Signs Manual
- He has contributed to revisions on regulation 97 of the Construction Regulations 2006 for working on roads, and HSA Working on Roads Guidelines

Charlie is fully qualified in all aspects of traffic management (planning, design and operations) with experience in identifying training needs and provision of training programmes across 31 local authorities and the private sector for technical and operational staff.

Programme

Registration at 9:00am with seminar start at 9:30am

- 9:30 **Managing Risks associated with Temporary Traffic Management (Safety Management System and practical)**
- 9:50 **Identifying proper controls and proper assignments of responsibilities**
- 10:10 **Systems of Control**
 - Appropriate use of standard plans and layouts
 - Site specific plans designed by designers
 - Job pack requirements
- 11:00 **Break**
- 11:15 **Planning and Design of Temporary Traffic Management in accordance with Chapter 8**
- 11:45 **Temporary Traffic Management Operations**
- 12:15 **Safety for pedestrians and vulnerable road users**
- 12:40 **Training requirements**
- 13:00 **Close**

- He was the project lead of the nationally recognised Planning and Design of Traffic Management Course for both low speed and high speed roads
- He was also the project lead for the nationally recognised Traffic Management Operations Courses for Motorways, including Static Operations, Mobile Operations, IPV Driver, and Supervisor
- Charlie was the lead author and subject matter expert for CSCS Signing Lighting & Guarding at Roadworks and the CSCS Health and Safety at Roadworks and other Traffic management courses, including Temporary Traffic Signals and Stop Go Operator

Or please send completed Application Form with Fee to:

National Irish Safety Organisation, A11 Calmount Park, Calmount Ave, Ballymount, Dublin 12.
